Making Vehicle Safety and Security Affordable

***HH DRIVERIGHT** was established in 2018 and within 12 months had developed a driver app with vehicle management technology and a vehicle tracking and immobilisation device. These devices aim to improve vehicle safety and security and provide quality management information. For the benefit of the driver and the business. Better management of people and assets reduce operating costs and allow for reinvestment in further improvement*

GM2020 HARDWARE

GPS tracker and immobilisation device

Enabled with both remote and automatic immobilisation and auto locking (if supported) to protect your vehicles from theft.

Get updates direct from the vehicle dashboard to keep on top of your vehicle maintenance.

Monitors driver behaviour including speeding, harsh cornering and harsh braking.

Links to your own personal/insurer dashboard for instant access to your detailed data.

Tracker + Immobiliser

FLEET MANAGEMENT REPORTS

Generate reports on all aspects of your fleet including: Immobilisation events, speeding, trip history, driver rating, impacts.

REMOTE AND AUTO IMMOBILISATION

Identifies when a driver leaves the keys in the ignition and gives an in-cab alert. If the alert is not rectified, (by shutting and locking the door) the system will trigger immobilisation of the vehicle.

LIVE FLEET VISIBILITY

Track and monitor your assets in real-time using your own personalised web-based dashboard, accessible through any internet enabled devices.

HHD S7 GPS TRACKER

Thatcham S7 approved GPS tracker

**Thatcham
Research**
SECURITY CERTIFIED

Approved by Thatcham Research to their S7 certification for Asset Location Systems

Theft Response Team
HHD can offer a 'Response Service', in the event of the Police being unable to attend a theft in good time.

Monitors driver behaviour including speeding, harsh cornering and harsh braking.

Thatcham Approved Tracker

Links to your own personal/insurer dashboard for instant access to your detailed data.

FLEET MANAGEMENT REPORTS

Generate reports on all aspects of your fleet including: Immobilisation events, speeding, trip history, driver rating, impacts.

REMOTE AND AUTO IMMOBILISATION ADD-ON AVAILABLE

Identifies when a driver leaves the keys in the ignition and gives an in-cab alert. If the alert is not rectified, (by shutting and locking the door) the system will trigger immobilisation of the vehicle.

INSURANCE APPROVED

Recognised by a wide list of insurance companies as a proven solution for your vehicle. As a result, you may be entitled to a discount on your premium of up to 12.5%.

GM2020 TRACK

Special and small waterproof GNSS tracker with built-in accelerometer

Easy self-installation with direct 2 point connection to the vehicle battery.

Far reaching compatibility. Covers 176 countries including all the UK and Europe.

In-built back-up device battery to work without external power supply.

Links to your own personal or insurer dashboard for instant access to your tracking data.

Self Install Tracker

INSURANCE APPROVED

Insurance approved tracking of both mileage and location. Data delivered straight to our dashboard. Covers 176 countries including all of UK and Europe.

EASY TO INSTALL
